

FREE PowerAlert 12 Power Management Software

MODEL NUMBER: **POWERALERT12**

Description

Do you need a comprehensive tool for managing power across your network? PowerAlert software enables customizable network monitoring and control—both locally and remotely via internet connection—of thousands of UPS systems and PDUs on various operating systems. And did we mention it's free?

Features

- Provides network power control from any web-browser
- Provides the ability to monitor multiple Tripp Lite UPS systems from a single computer
- Allows you to set customized alert parameters for a variety of different events and choose the actions you want the computer running PowerAlert to undertake in response to those events
- Provides a common interface for all supported UPS systems
- Multiple-device support. Allows one computer system to manage/monitor more than one UPS per system. Provides industry first software package to support a redundant UPS setup without any extra components.
- Provides load shedding and shutdown options for UPS systems with individually switched outlets
- Monitors network power conditions and controlling system activity from anywhere on the network via SNMP
- Provides management not only within a server's local environment, but also across the enterprise to distant servers and workstations

Specifications

Highlights

- PowerAlert modules are available for Windows - Windows 7 & 8 (32 & 64 bit), XP, Vista (32 & 64 bit), Windows Server 2003 (32 & 64 bit) and Windows Server 2008 (32 & 64 bit); Linux (OpenSUSE and Fedora); Macintosh (OS X)
- Multiple-device support. Allows one computer system to manage/monitor more than one UPS per system
- First software package to support a redundant UPS setup without any extra components
- Allows you to customize alert parameters for a variety of different events
- Provides network power control from any web-browser
- Java installation and interface
- SNMP-based communication

Applications

- Ideal for controlling and monitoring of network UPS systems — including those in remote locations and/or using different operating systems — from a single computer or web-enabled device

Package Includes

- PowerAlert CD-ROM
